Medication Refills & Follow-Up Appointments Contract

To prevent interruptions in your child's medication, please plan ahead for follow-up appointments and refill requests.

Schedule Your Follow-Up Early

1-month follow-up: Please schedule your appointment within 25 days of your last visit.

3-month follow-up: Please schedule your appointment within 85 days of your last visit.

Your provider will prescribe 1 or 3 months of medication based on your child's treatment plan and recommended follow-up schedule.

Need a Refill?

Please contact our office 3-5 business days BEFORE your child will run out of medication.

Refill requests require time for provider review and processing. We cannot guarantee same-day refills or that last-minute requests will be completed before your child runs out of medication.

If your child is due or overdue for a medication-management appointment, a follow-up visit may be required before additional medication can be prescribed.

Help Us Avoid Gaps in Medication

- Schedule follow-up appointments before leaving the office.
- Keep track of how much medication you have remaining.
- Request refills 3-5 business days in advance.
- Keep all required medication-management appointments.

Thank you for helping us provide safe and timely medication management for your child.
